Utah and Idaho schools, colleges, and universities require safety, security, and certainty—now more than ever. Pro Edge and Axis move you beyond basic security to meet the needs of your students, teachers, and staff today, and into the future.

Safety and Security on Campus Isn't Just a Feeling

It's a documented, verifiable, and auditable fact. It's time to go from waiting for a "worst case scenario" to proactive incident prevention—to cover campus blind spots and support trust, accountability, and compliance.

Our end-to-end network solutions help you do just that.

Simplifying Technology Through Transparency

By tapping into Axis Communications' extensive video surveillance, access control, intercoms, and audio systems, we ensure end-to-end technology that addresses the top priorities of preschool, K-12, and higher education alike.

More Than Just the Camera

Back in the day, security and safety was assured only by a camera. Now, there's much more to it. From intercoms to weapon detection analytics, our end-to-end systems address your top priorities and help you see real results—like safety monitoring in classrooms.

Real Outcomes for Campuses of All Sizes

Explore the impact of end-to-end network solutions at a campus just like yours. This is only the beginning of how our technology can work for you.

Preschools | Middle Schools | High Schools | Higher Education

PRESCHOOLS AND EARLY CHILDHOOD

Every Pickup In the Right Hands

There's no time for teachers and staff to guess if an unfamiliar adult is at the door. Our solutions provide a seamless, secure pathway to pre-authorized individuals—verified by intercom and integrated video—a child never leaves with anyone who shouldn't be there.

Possible With Solutions Like

AXIS 2N IP Video Intercoms | Fixed Dome Network Cameras
AXIS Camera Station

Preschools | Middle Schools | High Schools | Higher Education

MIDDLE SCHOOLS

All Eyes on Student Safety

To keep tension from building between groups of students, security staff have continuous access to loitering detection analytics. This provides immediate awareness of potential incident areas, so preventative action can be taken to reduce potential events, and—if necessary—response is immediate and targeted.

Possible With Solutions Like

AXIS Object Analytics | AXIS Network Audio
AXIS Camera Station VMS

Preschools | Middle Schools | High Schools | Higher Education

HIGH SCHOOLS

No Witness? No Problem

After a school day, a student returns to the parking lot to find a dent in their car door. Even though no note was left, campus administrators aren't without answers. A camera captures vehicle plate entering and exiting the lot, and the responsible parties is identified within minutes.

HIGHER EDUCATION

Campuses That Stay Bright

Walking alone on campus at 11PM, a student feels uneasy. They hurry to an emergency call station and push an SOS button. A dispatcher has immediate eyes on the scene through cameras that capture clear, full-color video in near darkness—details other systems miss entirely. The dispatcher reassures the student that they're safe, and directs them to wait for a security guard to walk them back to their dorm.
